

Energy Saving Coating

Lines, Panels and Equipment Loads

Nano ETech Powered by Quantum Anomalous Hall Effect (QAHE), an energy-saving coating revolutionizing industrial efficiency. With zero-investment Energy Performance Contracts (EPC) and verified savings or direct procurement, Nano ETech optimizes energy usage in **lines, panels and equipment loads**, ensuring significant reductions in consumption without sacrificing output.

For further details, please visit our website at: www.nanoviz.co

Key Features

Zero Investment

Enjoy energy savings without upfront costs

Non-Invasive

No modifications to existing systems required

Professional Verification

Audited for transparent results

Zero Downtime

Minimal disruption to low-voltage operations during application

Shared Savings

Benefit directly from reduced energy consumption

Short EPC Tenure

Rapid returns on investment

Enhanced Efficiency

Improves equipment efficiency without output sacrifice

Certified Safety

Non-toxic, RoHS compliant and non-flammable

Proven Performance

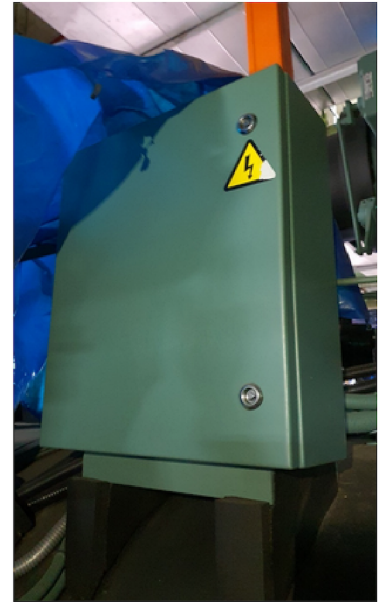

Independently validated energy savings across industries

Energy Saving Coating

Lines, Panels and Equipment Loads

Scenario A: Your current electricity bill

You: Pay the total electricity bill, as usual. Overtime, energy efficiency drops, causing cost to increase for same production output.

Your Factory

Total energy cost per month

Scenario B: New electricity bill payment

You: Pay the 'expected total' electricity bill, where the money saved is paid to NanoViz Sdn Bhd for the agreed number of years. Afterwards, enjoy the benefits.

Your Factory

Total energy cost per month

Money saved per month

To pay to **NanoViz Sdn Bhd**
